## THE "BIJOU" REFRIGERATOR.

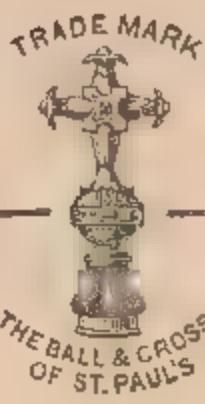

VENTILATED.

**T**HIS Refrigerator is designed to meet the demand for a small Cabinet which will not take up more space than an ordinary chest; it is fitted with a Water Cistern and Draw-Off Tap for iced water, and has loose Shelves, which, when removed, give a large internal space, also allows Joints of Meat, &c., to be hung from the hooks and rod in the upper part. A Zinc Bowl is included, for the water to run into as the ice slowly melts.

### OUTSIDE SIZES.

2ft. wide, 3ft. 4in. high, 1ft. 9in. deep	... ... ...	£6 10 0

# THE GLACIATOR ICE CREAM FREEZER.

(PATENT.)

## ENGLISH MAKE.

Fig. 1.—(One Quart).

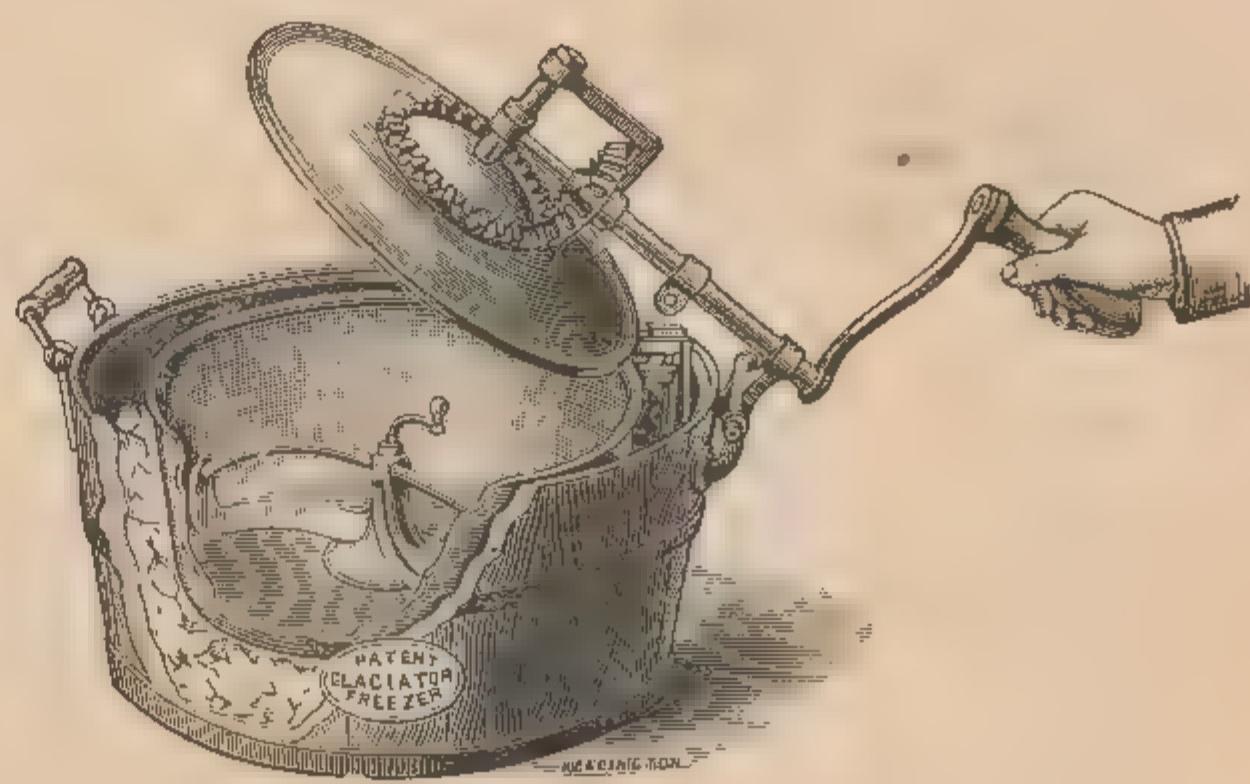

Fig. 2.—(Two and Four Quarts).

**T**HIS Machine is most simply constructed and will be found to be a thoroughly reliable article, and specially suited for use in private households and hotels.

The Pan is made of strong tinned copper, which will withstand the action of the Freezing mixture much better than zinc or tin.

### THE SPECIAL ADVANTAGES ARE:

SIMPLICITY IN CONSTRUCTION.

RAPIDITY IN FREEZING.

ECONOMY IN WORKING.

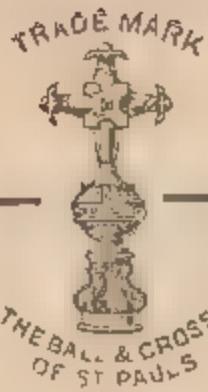

NO SPADDLE IS REQUIRED.

THE CREAM CAN BE EASILY INSPECTED DURING FREEZING.

### PRICES:

## THE "PERFECT" EGG POACHER.

FIG. 1.

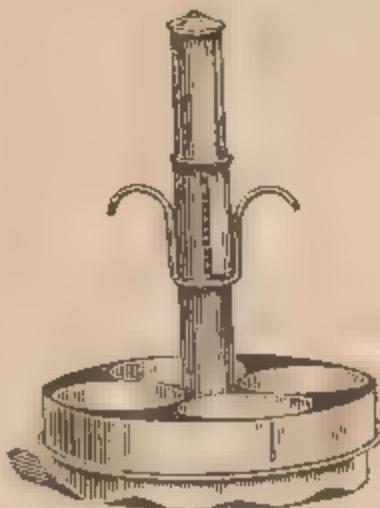

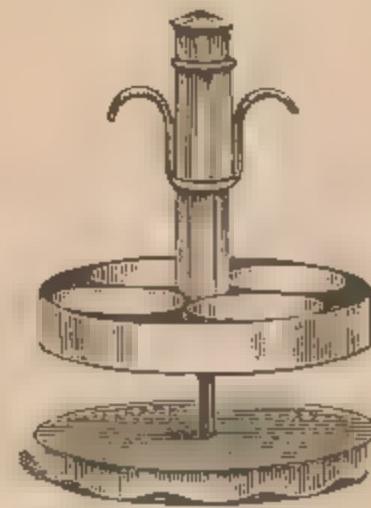

FIG. 2.

THE chief and most important point of this improved Egg Poacher consists in a Spring arrangement within the centre tube, and a hook-shaped ear on each side, as shown in illustration. By placing the two fingers under the hooks and drawing the hand upwards, the egg rings are held fast by simply giving a slight sideway movement of the hand (see Fig. 2); while a slight reverse movement sets the spring free, and replaces the rings on the plate (see Fig. 1.).

Another important point is the scalloped Ring round the lower part of the cooking plate, which allows the boiling water to flow under the eggs, thus saving time in cooking, and securing the flavour of the eggs.

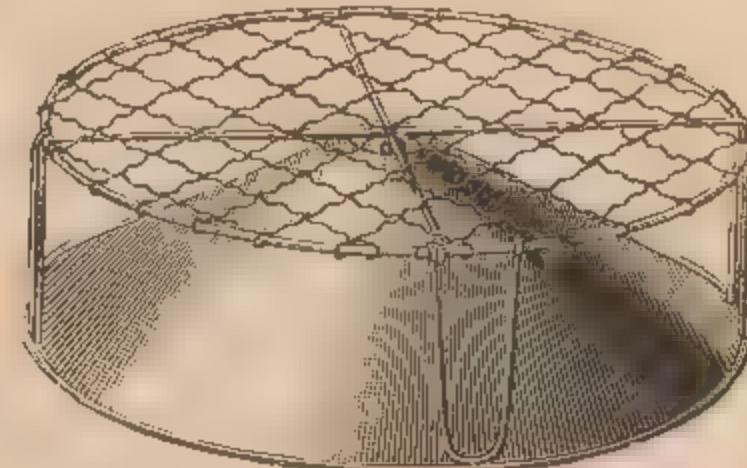

Price ... ... **2/9** each.

# THE RAPID COOKERY STEAMER.

(PATENT).

Special Award International Food and Cookery Exhibition, 1889.

**COOKS** { POTATOES, LIKE BALLS OF FLOUR; FISH, PERFECTLY;  
POULTRY, WHITE AND TENDER; PUDDINGS, LIGHT AS A FEATHER.

**T**HIE action of the Steamer is this:—When water is first placed in the saucepan as directed, the water is at the same level under the Cone as it is outside the Cone. Steam is generated first under the Cone, and as the water becomes heated to a temperature of about  $150^{\circ}$  the water is forced from under the Cone, leaving about a quarter-of-an-inch of water. This boils much more rapidly than the water outside the Cone, and quickly generates steam, which, confined in the Cone, lifts the ball at the top, and a large continuous volume of superheated steam issues from under ball, which is hotter, dryer, and of a better cooking nature than can be obtained from any other cookery steamer extant.

## ADVANTAGES.

The RAPID generates 30 per cent. more steam than any other Steamer, and can be placed in several sized Saucepans; also makes the steam of a hotter and dryer nature, consequently the food is cooked more quickly.

## DIRECTIONS FOR USE.

PLACE THE STEAMER, MARBLE UPWARDS, IN A SAUCEPAN THAT IT FITS, OR NEARLY SO.

POUR WATER INTO THE SAUCEPAN UP TO WITHIN HALF-AN-INCH OF TOP OF CONE.

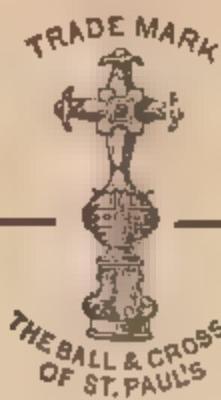

THE FOOD TO BE COOKED TO BE PLACED ON THE WIRE STAND.

THE LID OF THE SAUCEPAN MUST BE KEPT ON TO CONFINE THE STEAM.

## PRICES.

Special Sizes made for Oval and Round Fish Kettles.

# VESSELS FITTED WITH THE PATENT “RAPID” COOKERY STEAMER.

OVAL BOILING POT.

ROUND SAUCEPAN.

THESE illustrations show the “Rapid” Steamer applied to the ordinary straight-sided Saucepan, also to an ordinary Oval Boiling Pot.

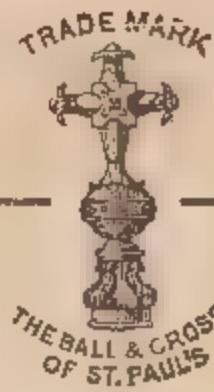

The success of this invention, and the applications from friends for special utensils fitted with the “Rapid” Steamers, prompted the introduction of these articles.

The Saucepans are fitted with a wire basket, which enables the cook to easily lift the potatoes out. The Oval Boilers will be found invaluable for steaming fish, poultry, hams, &c.; and the difference between boiling and steaming such things will be found most apparent. The Saucepans will steam potatoes like balls of flour.

Both these articles are recommended with every confidence—once tried, they will be in constant use.

# THE EVER-READY PLATE WARMER.

(TRENCH'S PATENT.)

FOLDS UP  
INTO SMALL  
COMPASS.

STRONGLY MADE  
IN  
TINNED WIRE.

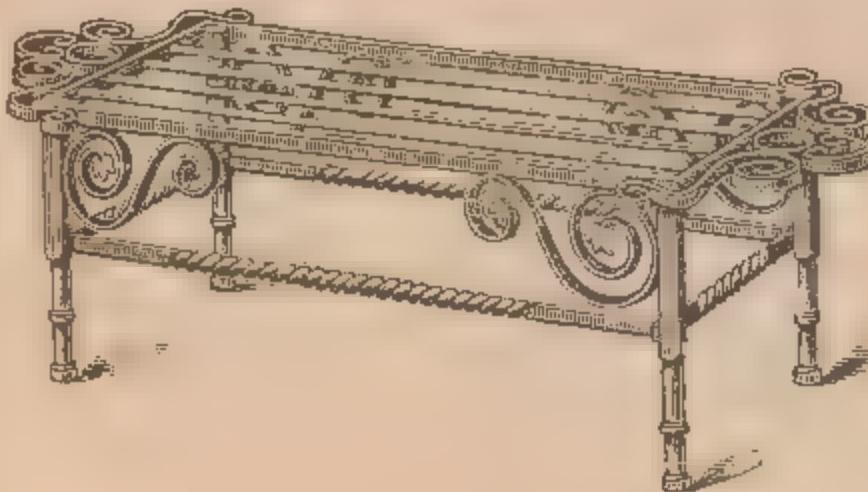

THE great advantage of this Plate Warmer over the ordinary pattern is that the whole surface of each plate is exposed to the fire, and a servant, waiting at table, can have a succession of hot plates ready to hand without leaving the room.

With the ordinary Plate Warmers, the edges only of the plates on one side are exposed to the fire, and, moreover, when the plates are warmed in the kitchen, they often become cold before they are actually wanted.

DIMENSIONS OF STAND (exclusive of plate holders)—24 inches long; 9 inches wide; 16 inches high.

PRICE 13 6 EACH.

Copper and Brass ... 6 6 "

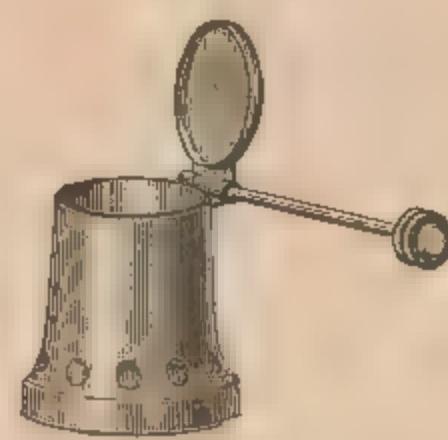

E  
TRAVELLING RÉCHAUD.

PRICE.

Tin ... ... ... 4/- each.  
Copper and Brass ... 8/3 "

For Kettle  
to suit this Réchaud,  
see page 6.

Capacity, 1½ pints.

STRONGLY MADE

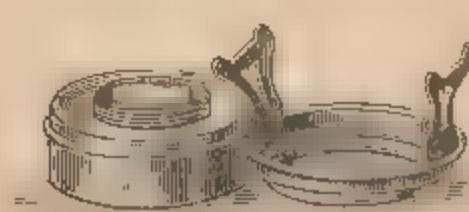

IN COPPER.

Price 2/6 each.

A simple invention by which it is rendered impossible to extinguish the flame on any Réchaud with which it is used. It is introduced to meet the demand for a Spirit Stove which can be used with safety in the open air; it is thus specially suitable for picnics, yachting, etc.

In addition to the above advantages, it acts as a chimney, and increases the amount of heat generated, so that water, etc., can be boiled more quickly.

Section of Nos. 1 and 2.

Nos. 1 and 2.

Nos. 1 and 2 in use

No. 3.

## FOOT & BED WARMERS.

AUBERTIN'S PATENT.)

HE Special Feature of this Patent consists in its being so constructed that it will retain the heat for many hours. The Warmer is double cased and packed with a special non-conducting material, only a small quantity being used on the top, allowing the heat to escape where required. This arrangement ensures a comfortable heat from first to last, thereby presenting a great advantage over other Warmers which are frequently too hot at first and soon get cold. THE SMALL No. 1. Four WARMER WILL KEEP AT A COMFORTABLE HEAT FOR AT LEAST 6 HOURS when exposed to the atmosphere; if used in a bed or otherwise protected, FOR ABOUT TWENTY HOURS. The No. 2, for Cabs, Carriages, etc., will last TEN HOURS, and the No. 3 about TWELVE HOURS.

Another Special Feature of this Warmer is that it is covered with carpet with a loose flap, whereby the feet can be completely covered while resting on the Warmer, and which enables the heat to be retained.

### ADVANTAGES

It will retain the heat considerably longer than any other warmer.

It is so constructed that it gives a comfortable uniform heat the whole time.

The WHOLE OF THE FEET ARE WARMED being covered with the loose carpet flap, whereas with the old style the soles of the feet only are warmed.

It is most convenient for the feet to rest upon, having hollowed sloping sides, hence the feet do not become tired during long journeys.

It gives no smell or smoke, is light and cleanly to handle, and can be emptied in a moment.

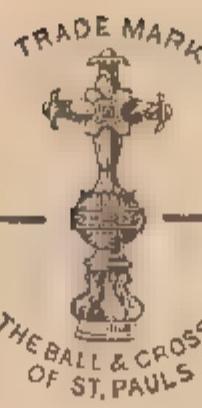

### DIRECTIONS FOR USE.

Open the screw with a penny or any large coin, fill with boiling water, then empty and re-fill immediately, taking care that it is quite full. Replace the screw securely. Provided the water is quite boiling it will keep warm AT LEAST the length of time above mentioned.

## DOMESTIC

## APPLIANCES.

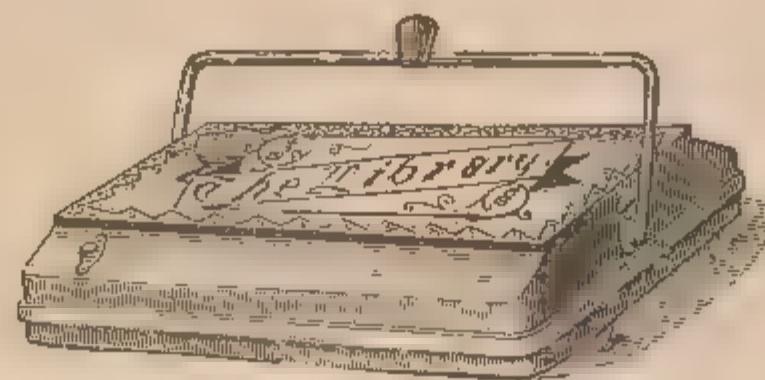

## THE "CHANDOS" CARPET SWEEPER.

THE "Chandos" Carpet Sweeper is one of the very best patterns, thoroughly well made in solid oak and walnut, and is highly finished. The Brush is of pure bristle, and is driven by noiseless india-rubber tired wheels, with which it is impossible to injure the carpet. It is provided with a band, which prevents injury to the furniture. The Handle is reversible, enabling the machine to be used from either side. The sweepings can be emptied without soiling the hands, by simply pressing the spring lever. It is a Sweeper which for strength and durability can be strongly recommended.

Price ... ... 15/- each.

## THE "LIBRARY" CARPET SWEEPER.

THIS Machine contains the good features of the "Chandos" Sweeper, but is finished in a slightly cheaper form. It is very strongly made in maple wood, and is an exceedingly neat, compact and well-finished article. Its working capabilities are guaranteed.

Price ... ... 12 6 each.

# THE "PERFECTION" PHOTOGRAPHERS' DARK ROOM CANDLE LAMP.

(HAES'S PATENT.)

THE FOLLOWING ARE SOME OF THE SPECIAL ADVANTAGES OF  
THIS LAMP:—

It gives much more light than usual, with much less heat.

It is quite free from the smell always accompanying the use of paraffin.

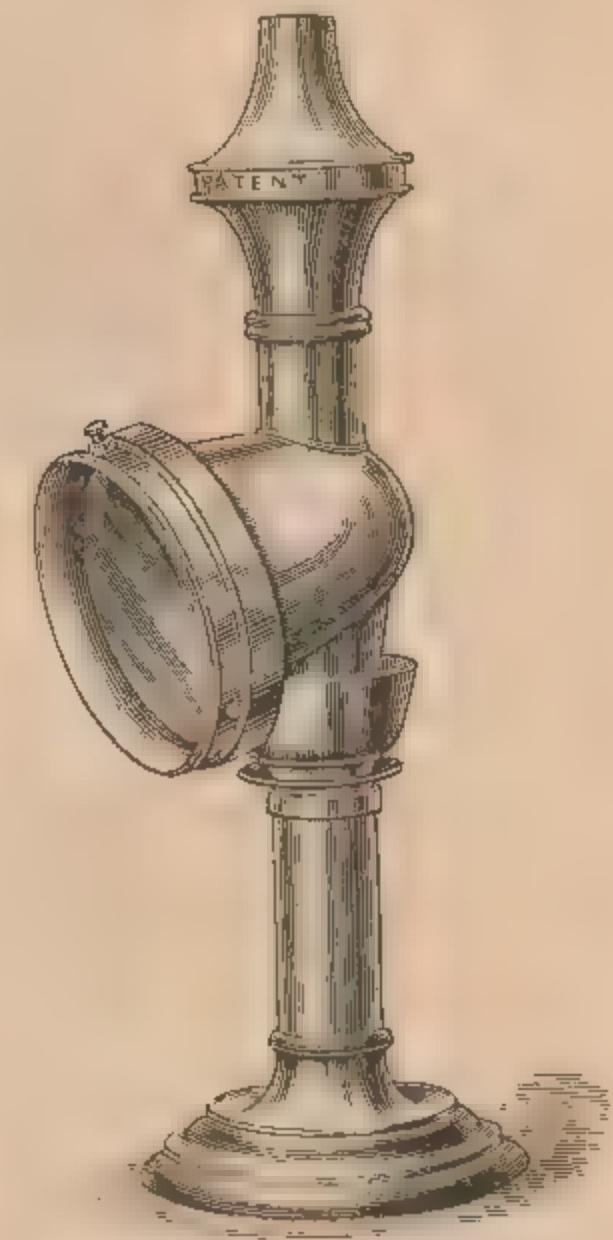

The light is quite safe for use with the most sensitive films.

White light is available in an instant, whenever required.

No chimneys to be broken or cleaned.

The candles, which are very hard and cleanly, can be easily and quickly replaced, and the annoyance of lamp trimming is avoided.

The lamp can be used at varying heights, the candle being held in an extending tube.

In addition to its Photographic uses, it makes the best Lamp yet introduced for

**READINGS FOR LANTERN ENTERTAINMENTS,**

Or can be used as an ordinary

**READING LAMP,**

FOR WHICH PURPOSE A CLEAR GLASS IS SUPPLIED.

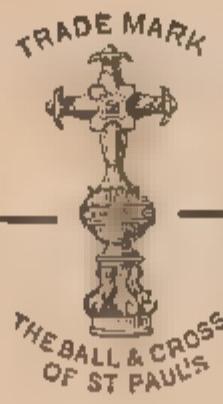

**NICKEL-PLATED THROUGHOUT, PRICE 21- EACH.**

SPECIALLY PREPARED CANDLES, 16 PER BOX OF SIX CANDLES.

EACH CANDLE WILL BURN ABOUT SIX HOURS.

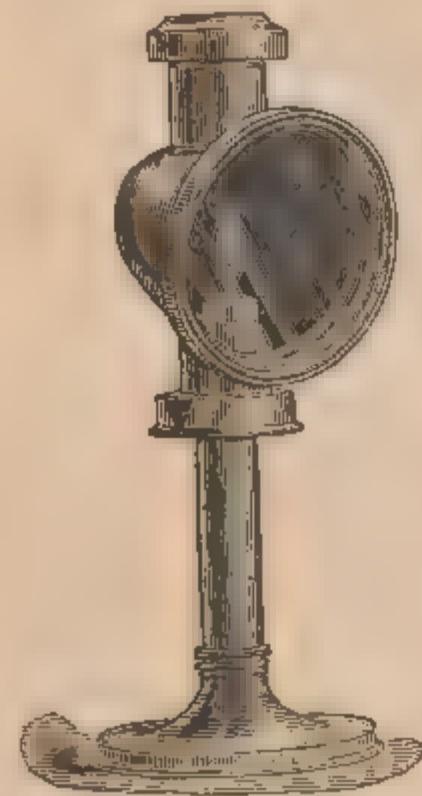

COLOURED GLASSES, 9d. EACH.

The Special Candles prepared for this Lamp should always be used,  
no others guaranteed to burn well.

# THE "HOLIDAY" PHOTOGRAPHERS' CHANGING AND DEVELOPING LAMP.

(PATENT.)

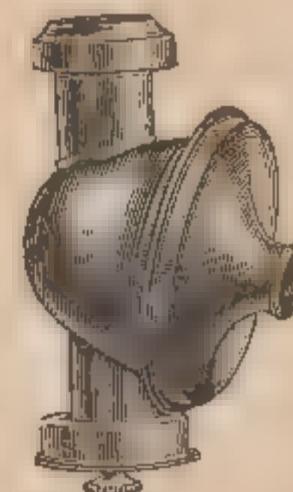

OPEN.

IN POLISHED BRASS,

PRICE, 10,6 COMPLETE.

CANDLES, 1/- PER BOX.

COLOURED GLASSES, 9d. EACH.

CLOSED.

THE MOST USEFUL TRAVELLING LAMP for Amateur Photographers, being equally suitable for Developing and Changing Plates when Touring.

## The SPECIAL ADVANTAGES of this Lamp are:-

**ITS PORTABILITY.** It is so constructed that the base of the Lamp forms a protecting cover for the front, and the tube slides up into the Reflector, the whole thus folding into a compact compass for travelling.

**THAT** by means of the PARABOLIC REFLECTOR, a very powerful light is obtained.

**THAT CANDLES ARE USED** which are cleanly to handle, and greatly superior in every way to oil.

**THAT** by means of the Reflector, the Lamp can be so placed that the light falls only on the work, and the EYES ARE NOT FATIGUED.

**ITS SUITABILITY FOR LANTERN READINGS**, and for ordinary reading purposes; CLEAR GLASS BEING SUPPLIED, as well as the developing glass.

**ONLY ONE COLOURED GLASS IS REQUIRED**, the glass supplied being quite safe for the most sensitive films on the market.

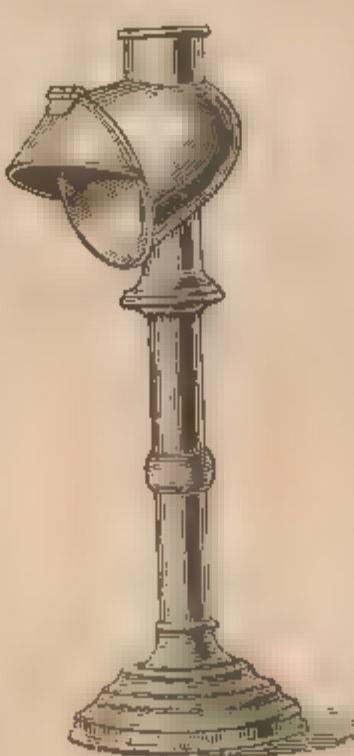

## "CAMBRIDGE" READING LAMP.

No. 7.

WITH HINGED FLAP TO REFLECTOR.

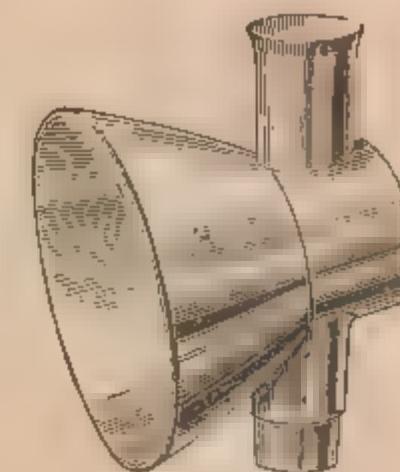

Nickel-Plated ... Price, 7/- each.

Special Candles, 16 per Box of eight  
Candles.

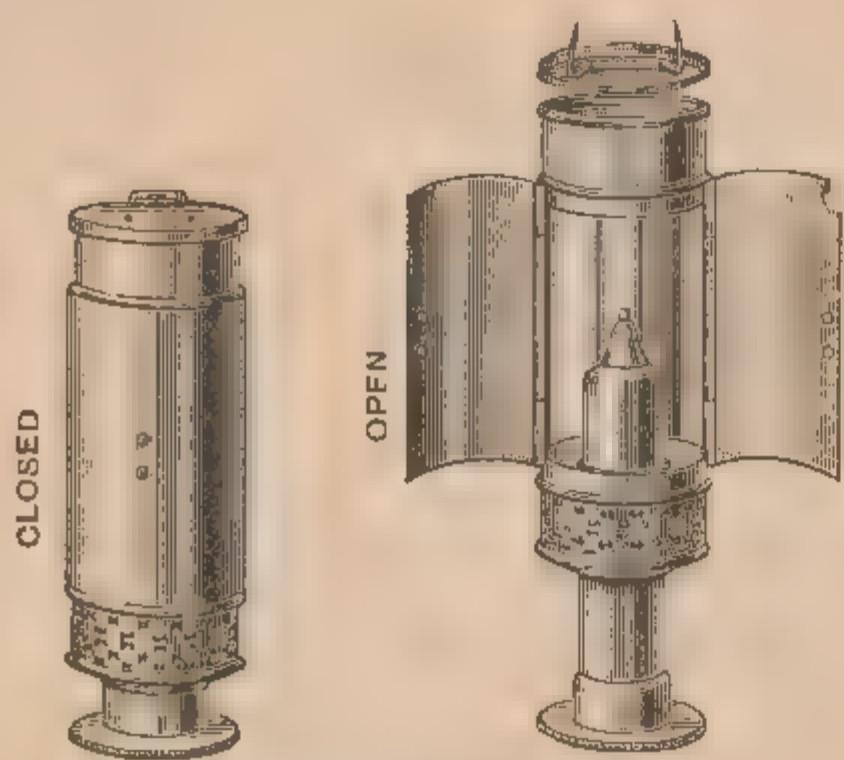

## No. 8. REFLECTOR, FOR CANDLE LAMPS.

With Square Back to Reflector, which concentrates the light, and renders the Reflector more powerful.

This pattern Reflector can be supplied with No. 2 or No. 4 Cambridge Lamp, at 9d. each extra, in Brass or Nickel.

FOR OTHER PATTERN CANDLE READING LAMPS, SEE PAGE 228, GENERAL CATALOGUE.

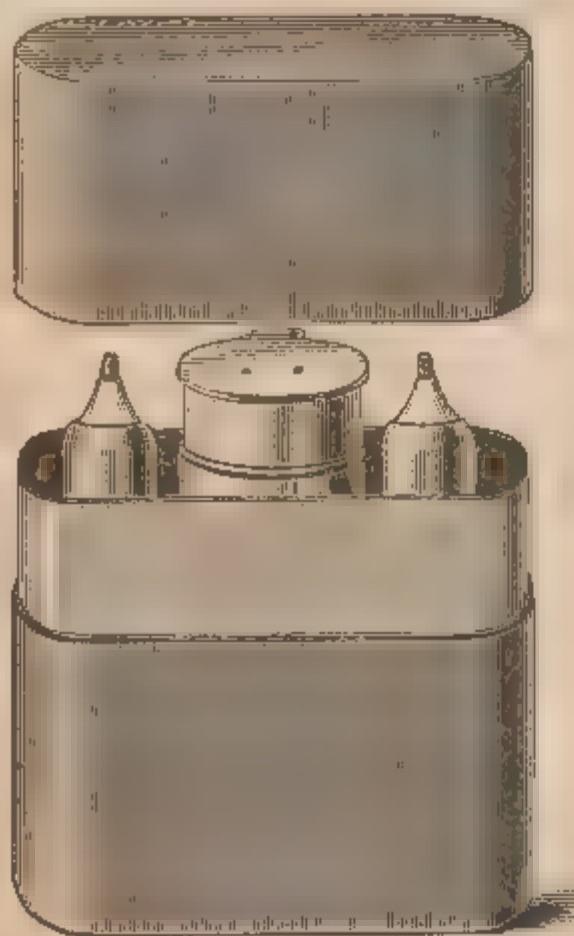

## THE MANCHESTER.

A NEAT, portable and well-finished travelling lamp —to hang or stand in window of carriage—compact and cleanly, and can be carried in coat pocket or travelling bag—each candle burns about  $2\frac{1}{2}$  hours.

Nickel Plated Price, 5/- each

Candles for ditto, 6 in box, 9d. per box.

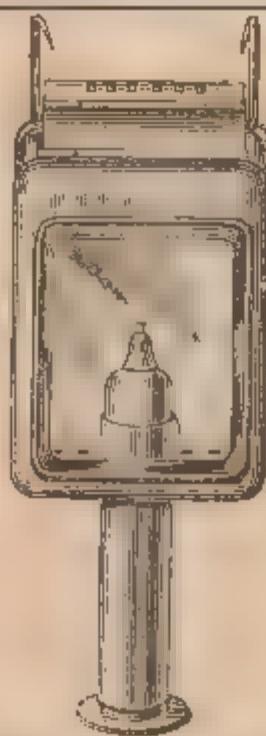

## THE LONDON TO EDINBURGH.

IN CASE.

THE above lamp in neat cardboard case, fitted with two extra candle tubes to replenish the light on long journeys—the 3 candles together burn for about 8 hours.

Nickel-Plated. Price complete, 10 6 each.

Candles for ditto, 6 in box, 9d. per box.

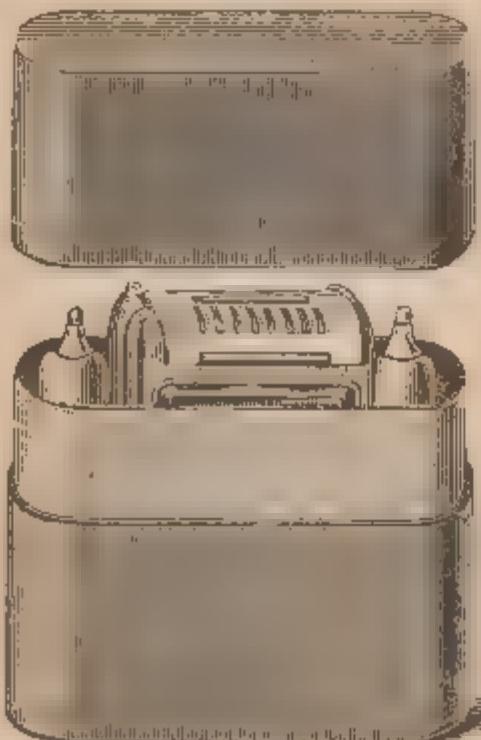

## THE KOH-I-NOOR.

AN improved shape with rounded corners, has an oak wood back forming a non-conductor and is highly finished.

Nickel-Plated. Price, 7/- each.

Candles for ditto, 21 in box, 9d. per box.

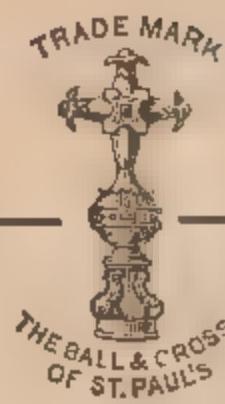

## THE KOH-I-NOOR.

IN CASE.

THE above lamp in neat cardboard case, and also two extra candle tubes, will be found most convenient on long journeys.

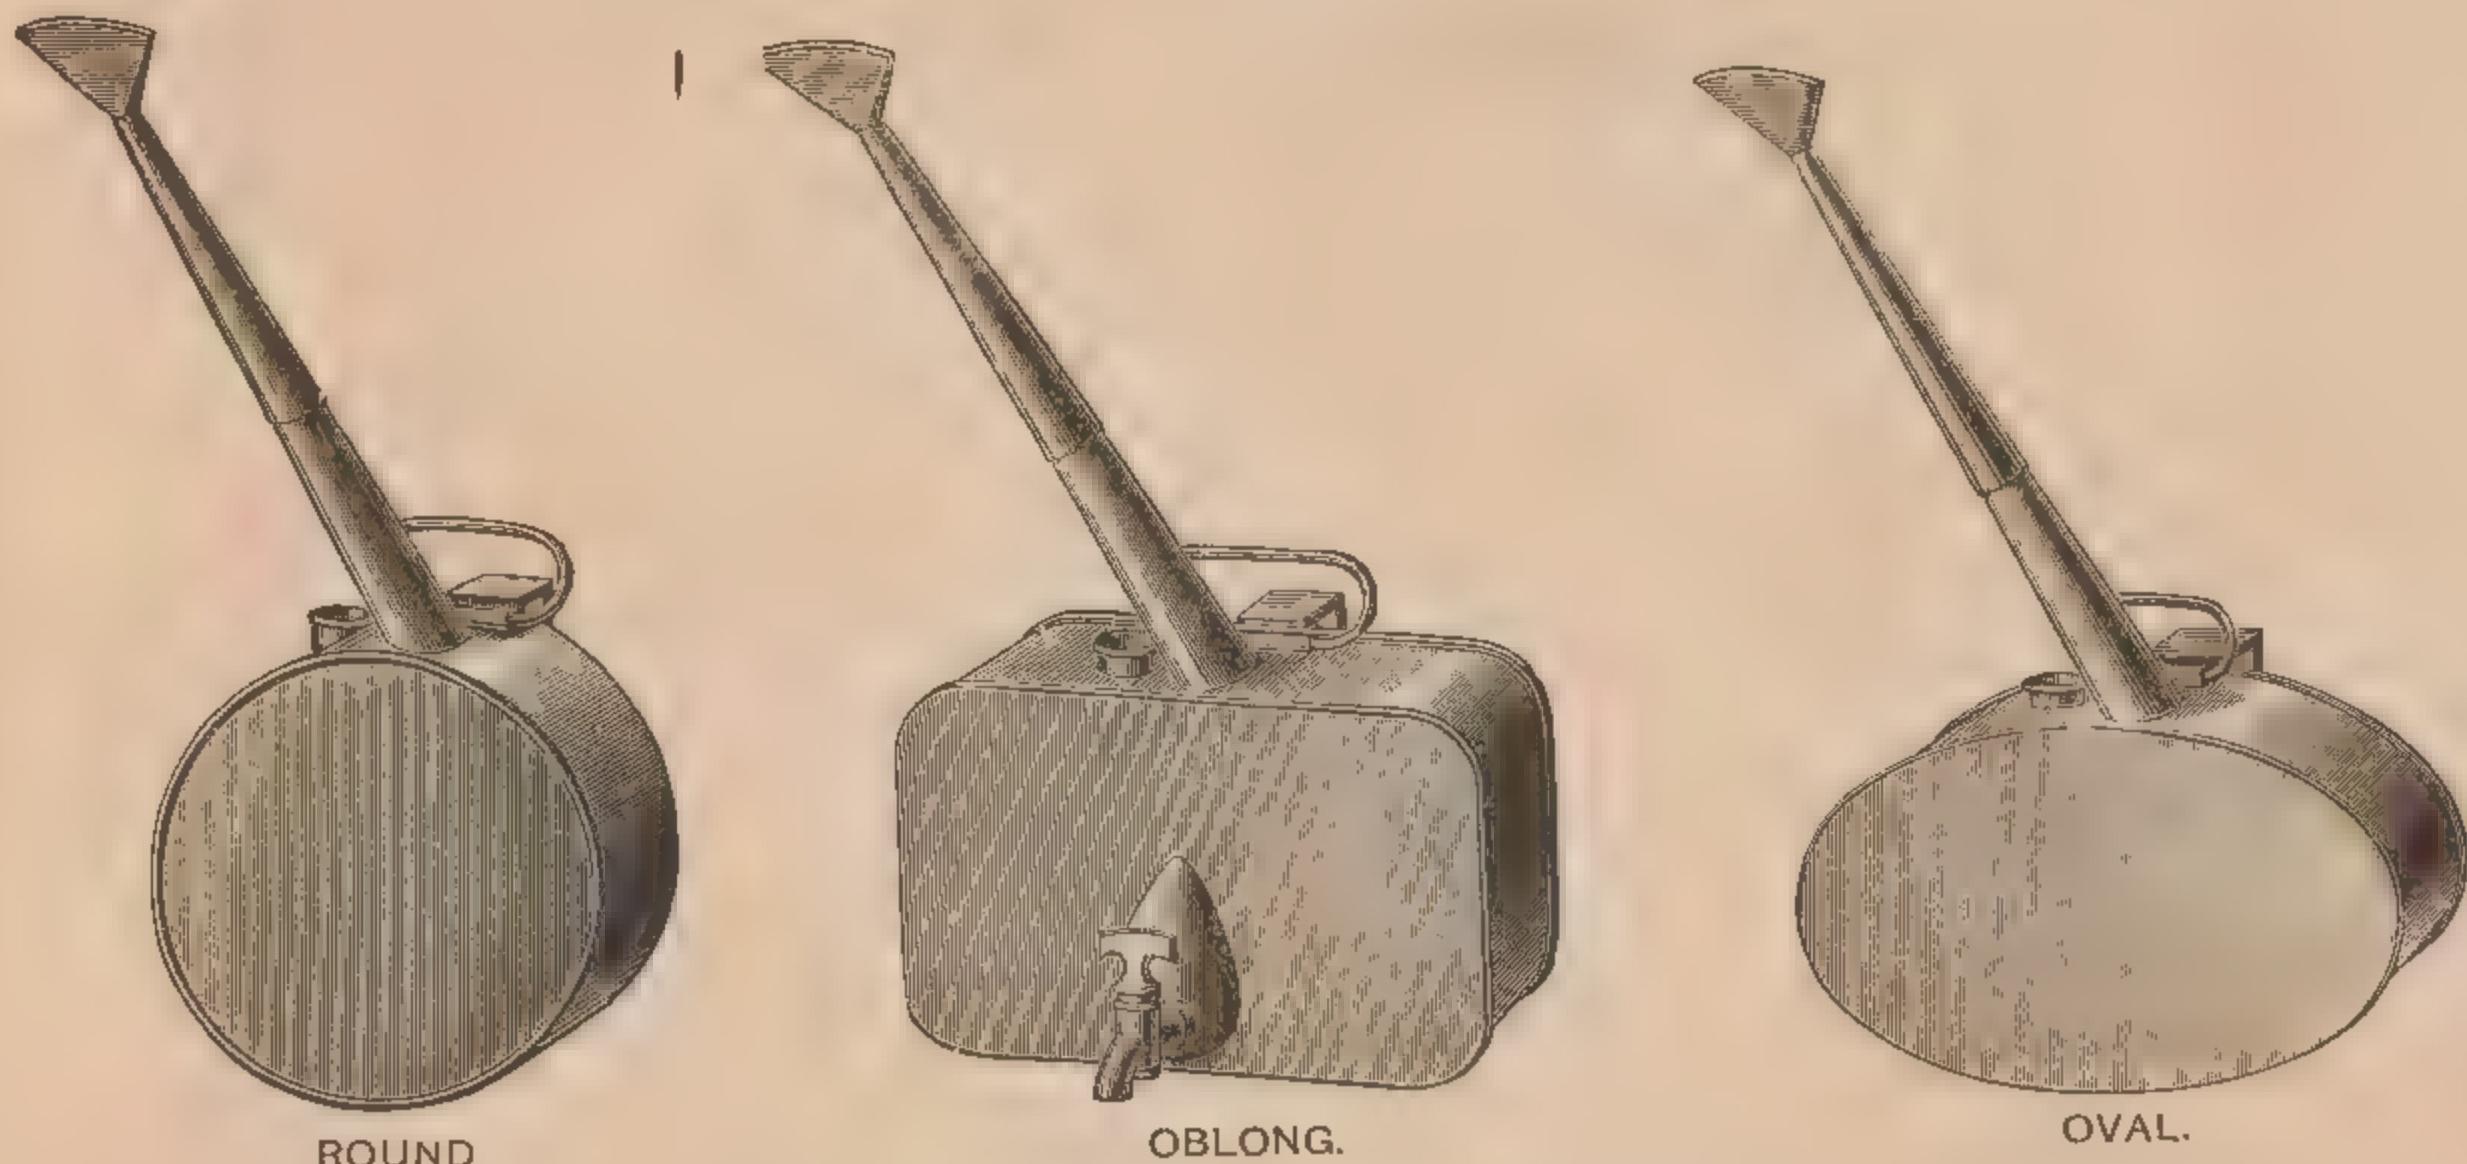

Nickel-Plated. Price, 12/- each.

Candles for ditto, 21 in box, 9d. per box.

# THE "BROMPTON" BRONCHITIS KETTLE.

(PATENT.)

STRONGLY MADE IN BLOCK TIN.

THE chief feature of this Patent Kettle is that there is a hook at the back to hang it in front of any ordinary fire. This arrangement presents the following advantages:

- 1.—The danger of upsetting is avoided.
- 2.—The steam is directed more effectually into the room.
- 3.—There is no fear of the smoke from the fire being forced into the room, as frequently happens with ordinary Kettles.
- 4.—The Kettle acts as a blower and increases the draught of the fire; and admits of coals being put on without removal of Kettle.
- 5.—The Kettles can be used with gas fires.
- 6.—By means of an India-Rubber Tube fixed to the spout, the steam can be conveyed to any part of the room desired.

ANOTHER SPECIAL ADVANTAGE in this patent is that they can be fitted with Taps, whereby hot water can be drawn if required.

		PRICES.

# PRICE LIST

OF  
HAMMERED, FORGED, WROUGHT-IRON WORK  
SHOWN IN THIS BOOK.

Many of the Designs are suitable also for working in Brass, Copper, and other metals.  
Prices on application.

Glasses of the patterns shown are included in all Prices, but extra if Ruby glass is required.

Silk Shades are not included.

Pendant-Candelabra and Gasaliers can usually be made with a greater or less number of lights than shown, for which quotations will be given.

## ELECTROLIER AND CEILING LIGHTS.

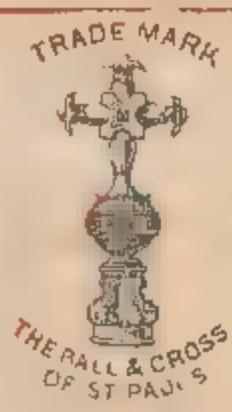

B. & F. LTD.  
LONDON.

ABOUT ONE-EIGHTH REAL SIZE.

# PRICE LIST.

THE FOLLOWING PRICES ARE FOR THE FITTINGS ONLY.

**Wiring and Holders** are not included (so many of our customers preferring to do their own), but we shall be always glad to undertake this work at most moderate extras, and to carefully test and to guarantee the same before sending out. In many instances it is advisable to wire fittings as they are made up, especially in the more delicate copper and brass patterns.

**Glasses** are only included in those patterns where they form an essential part of the design. We have always a large and varied assortment in stock from the best British and Foreign makers.

**Lamps** are not included in any quotation.

Electroliers can usually be made for a greater or less number of lights than quoted, at proportionate prices.
